California Regions-Study Guide

To help study for your test on California's Regions, we have attached a copy of the chapter in our Social Studies textbook. This chapter is one of the resources we used in class to learn about the regions and to help create our Regions Wheels.

For the quiz, you will need to know the following:

- ◆ the correct spelling of all four regions, as well as the words California and regions
- ◆ where each region is located on a map of California
- ◆ the climate in the desert, Central Valley and along the coast
- ◆ at least one major city in each region
- ◆ at least one major industry in each region
- ◆ at least three types of crops grown in the Central Valley
- ◆ the names of the two big deserts in that region
- ◆ which region Yosemite is located in
- ◆ which region we live in
- ◆ There will also be two short answer questions. One about the population in the coast and one explaining the reasons why they would live in a specific region of their choice.
